

SESSION 02

The Creative Process, Start to Finish

Unit 1 · Foundations of Creativity and Innovation

120 minutes · studio · COs 109.1, 109.2

THE ONE IDEA

The good idea is not the hard part. The hard part is everything that happens after it.

WHY IT MATTERS

1

The stages

Preparation, incubation, illumination, verification, implementation. Illumination is the one everybody romanticises and the one that takes the least time.

2

Incubation is real work

The idea that arrives in the bus is paid for by the two hours you spent stuck the day before.

WHAT TO DO WITH IT

3

Where ideas actually die

Two gaps: between illumination and verification (no cheap way to test), and between verification and implementation (it works, nobody does it).

4

Locating the stall

Your anchor's owner is stuck at exactly one of these stages. Naming which one is today's work.

TODAY YOU WILL

Find out which stage your anchor's owner is stuck at,
and write the problem in one sentence you could act on.

Marathi or Hindi · 60 minutes

TO CLOSE

Pitch

Three minutes. The person, the stuck, the idea, the picture, the ask.

Critique

I like... / I wish... / What if... — the idea, never the person.

Idea log

One page. Silent. Box 4 is the one you read again in week 15.
