

SESSION 09

# Mapping a Startup

Unit 2 · Mind Mapping and Creative Thinking Techniques

120 minutes · studio · COs 109.4, 109.2

## THE ONE IDEA

A startup is not an idea. It is a list of things that must all exist at the same time.

## WHY IT MATTERS

### 1 **Launch components as BOIs**

Offering, customer, channel, money, people, legal, technology. Four to seven of these become the main branches.

### 2 **The map exposes what you have not thought about**

A thin branch is not a small problem; it is an unexamined one.

## WHAT TO DO WITH IT

3

### **Tie it to your anchor**

The startup is either the digital version of what your owner already does, or the adjacent thing they could start.

4

### **Buzan's laws still apply**

Central image, one word per line, curved branches, landscape.

## TODAY YOU WILL

Create a mind map for a technology startup idea, visually breaking down the components needed to launch it.

*Prescribed syllabus activity*

Marathi or Hindi · 60 minutes

## TO CLOSE

### **Pitch**

Three minutes. The person, the stuck, the idea, the picture, the ask.

### **Critique**

I like... / I wish... / What if... — the idea, never the person.

### **Idea log**

One page. Silent. Box 4 is the one you read again in week 15.
