

SESSION 01

What Creativity Is, and Why Your Ideas Get Stuck

Unit 1 · Foundations of Creativity and Innovation

120 minutes · studio · COs 109.1, 109.2

THE ONE IDEA

Creativity is having ideas. Innovation is an idea that actually reaches somebody. This course is about getting from the first to the second.

WHY IT MATTERS

1

The distinction

A tea stall owner invents a new masala — that is creativity. Forty people a day buy it and come back — that is innovation.

2

Ideas have a lifecycle, and most die in the middle

Between "I thought of it" and "someone used it" there is a long gap.

WHAT TO DO WITH IT

3 Four barriers, none about talent

Judging too early. Fear of looking foolish. "We have always done it this way." The expertise trap.

4 These are predictable, so they are beatable

That is the whole course.

TODAY YOU WILL

Pick the one real business you are going to work on for the whole semester. Then write twenty questions you would need to ask its owner.

Marathi or Hindi · 60 minutes

TO CLOSE

Pitch

Three minutes. The person, the stuck, the idea, the picture, the ask.

Critique

I like... / I wish... / What if... — the idea, never the person.

Idea log

One page. Silent. Box 4 is the one you read again in week 15.
